Strategic E-Procurement Management

CEM14

Course Description::

The current state of general industrial management necessitates the assimilation of electronic procurement into strategic management.

E-Procurement know – how and management is therefore an essential integral part of modern day strategic business management, hence a must, for all related staff.

The application of internet based Procurement Management Systems enhances prompt and more accurate data processing, thereby delivering robust Management Information System (MIS) using information, communications & technology (ICT).

This program therefore emphasizes the importance of ICT in strategic procurement management.

During this five (5) day duration the program takes very close look at available e-procurement softwares and the key portals that enhance data security, data sharing (with varying authorization levels) and data & vendor services coding.

Participants will also try their hands on 'Live Vendor Registration' and 'Live Request for Quotation' (RFQ) on typical software.
