Oil & Gas
Consultancy Services & Technical Training Providers

Enhancing business through knowledge

About us

At Petroconsult Energy, our services are built around the areas of specialisation of our consulting and associate partners, particularly in the areas of petroleum exploration and development, economics, reservoir & field developments, mergers and acquisitions and E&P project management.

Our consulting partners have vast international knowledge and experience in these core areas of the energy industry having worked for considerable length of time therein.

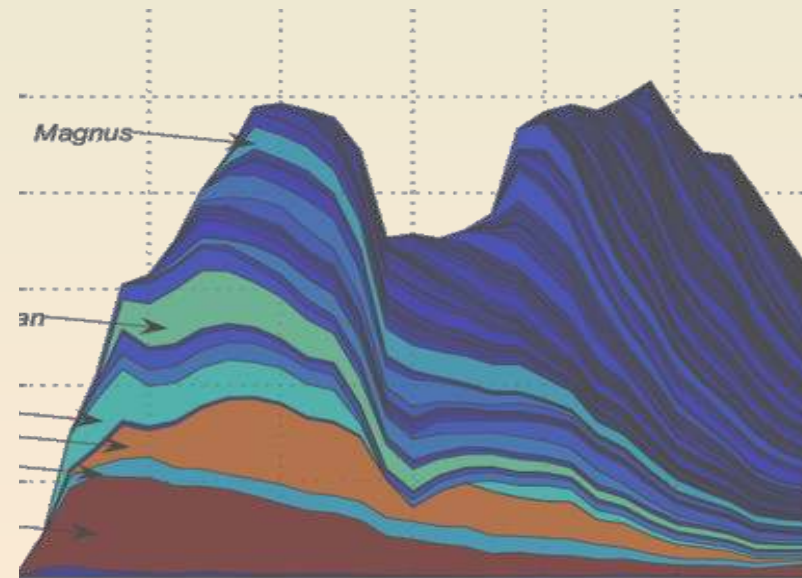

Their experience and expertise spans a variety of countries and cultures on a global basis, with up to date knowledge based on new technology, current and international practices within the oil and gas industry.

Reservoir Evaluation/Assessment and Management Service

Our Reservoir Asset Evaluation and Management services are adjustable for various asset sizes, deliverables and budgets. We provide integrated studies at various stages of green and brown field projects which include:

- ⇒ Reserves Audits and Estimation
- ⇒ Reservoir characterization & Geomodelling
- ⇒ Reservoir Simulation
- ⇒ Field Development Plan projects
- ⇒ Commercial & Economic Analysis
- ⇒ E&P Unitization Works

In pursuit of the above:

- We operate a hands on approach which ensures that clients have direct access to all senior technical consultants involved in their projects, and are kept an active part of the workflow.
- We work towards client deadlines with precision, accuracy and technical prowess.

Please contact us to discuss your Asset Management needs as they may be.
